«WELCOME TO THE URBAN JUNGLE»

Accio Bonuses

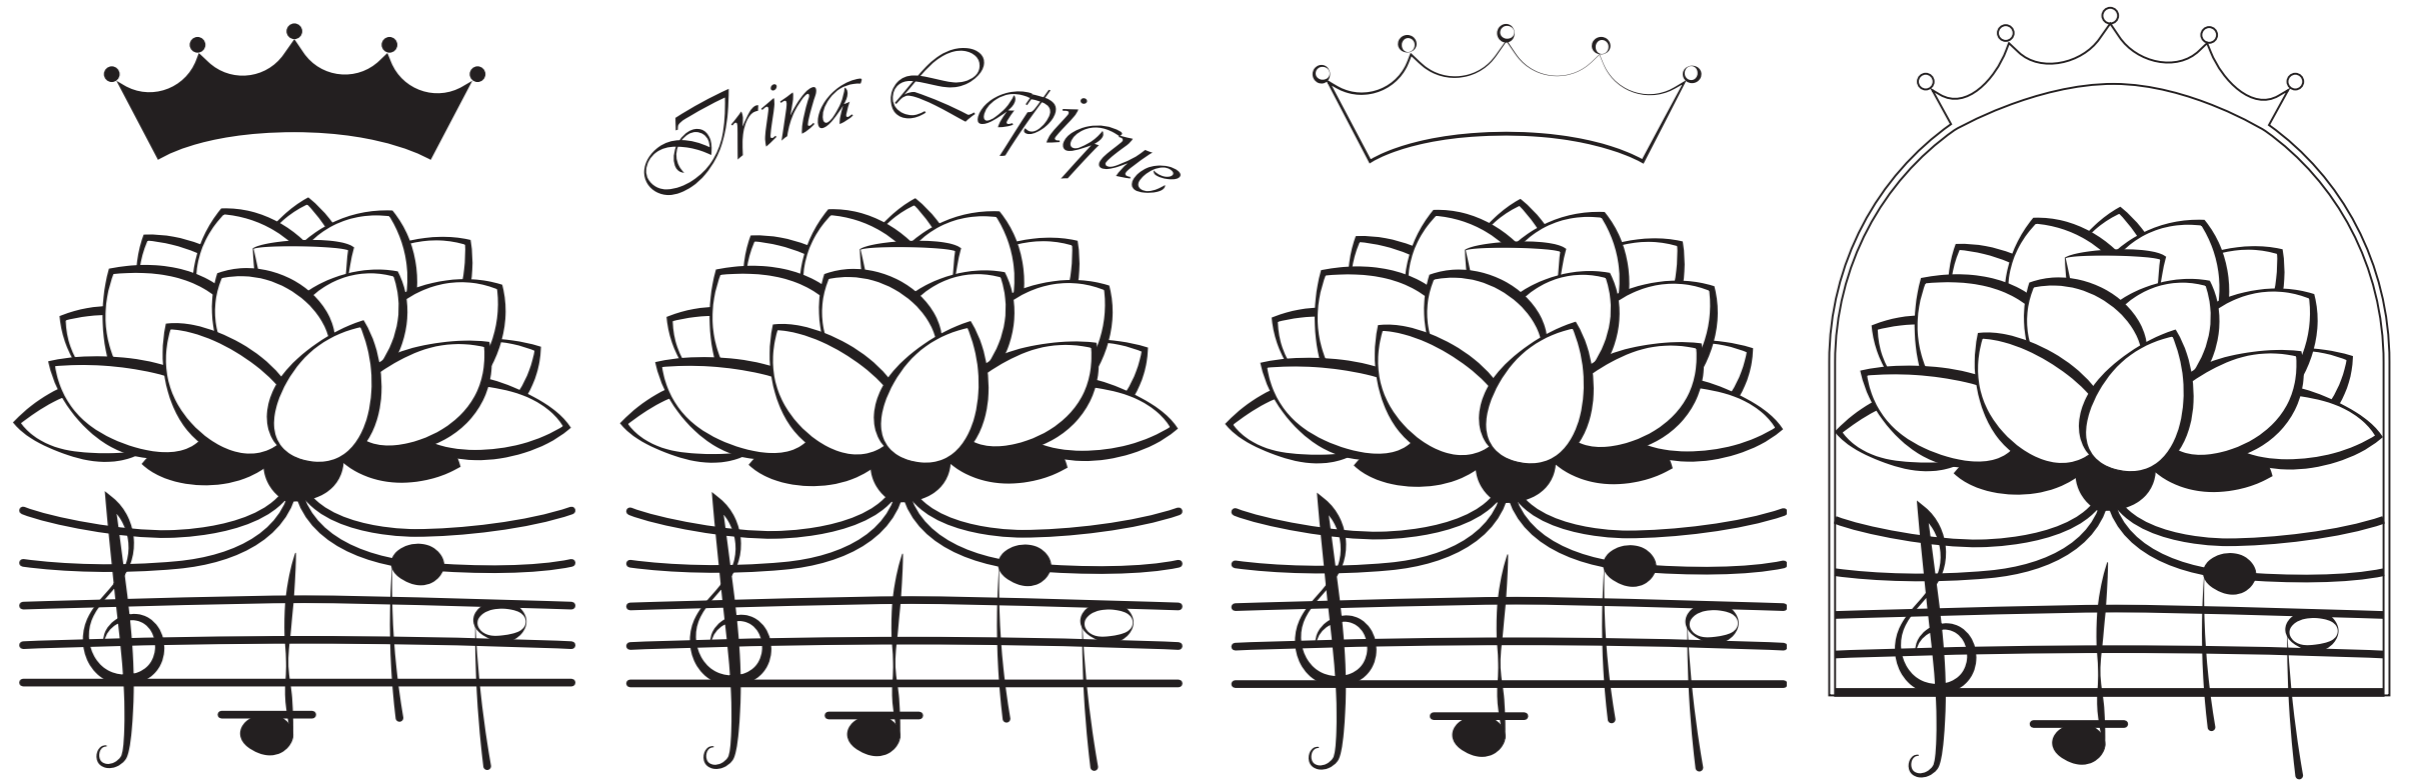

I was expected to prepare an ad banner with a promotion announcement. Since the Harry Potter spell "accio" sounds very close to "promotion" in Russian, I decided to play around with it.

FireTalks

I was asked to make an ad banner for FireTalks chatting platform. The feature of the platform is that the chat gets burned after the talk is finished.

Irina Lapique

A variety of logos for a perfume stylist, Irina Lapique.

FireTalks

Dictionary Design

A logo and interface for a Russian-English dictionary. The design is a bit controversial, but if you can read both Russian and English, you see that the whole word is written in Russian and means "words." The "V" in English and represents a book.

RAS Business Card

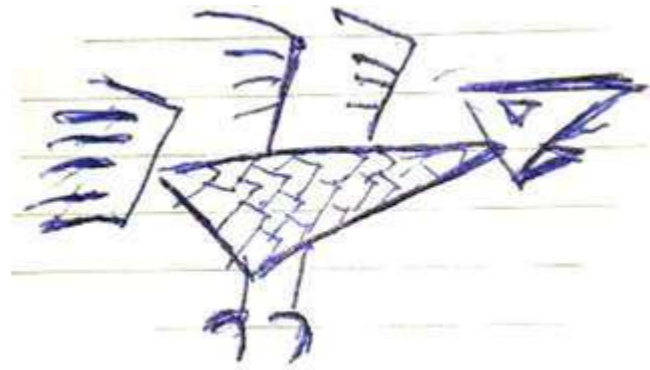

The whole design was based on the logo of the Institute – African content with the tiger pattern. I played around with silhouettes and the orange spot.

Webbird

The client suggested his own sketch as an idea of the logo he expected. This sketch became an inspiration for the final design I offered.

Path to My Heart

A hoody print and a package design. The whole concept was inspired by the kaleidoscope pattern.
